### PROFESSIONAL SUMMARY

Results-driven .NET Backend Developer with 1+ year of experience in developing backend services using .NET Core, and C#. Experienced in building secure RESTful APIs, database-driven systems, and authentication solutions including SSO. Contributed to enterprise platforms such as CRM, Inventory Management, and Field Service Management (FSM). Proficient in MySQL, MS SQL Server, Git, and NUnit testing, with a focus on developing scalable and maintainable backend solutions.

### TECHNICAL SKILLS

#### Programming Languages:

C#, SQL

#### Frameworks / Technologies:

.NET Core, ASP.NET Core Web API, ADO.NET, Authentication & Authorization

#### Database:

MySQL, Microsoft SQL Server, Query Optimization

#### Development Tools:

Visual Studio, Git, Postman, Swagger

#### Testing:

NUnit, API Testing

### WORK EXPERIENCE

Risolutor Technologies Pvt Ltd – Chennai | 2024 - 2026

#### Associate Software Developer

- Developed and maintained scalable backend APIs using ASP.NET Core Web API and C#.
- Designed and optimized database tables and queries using MySQL and MS SQL Server.
- Worked on enterprise applications including Inventory Management, CRM, and Field Service Management (FSM) systems.
- Implemented Single Sign-On (SSO) authentication to enable secure user access across modules.
- Utilized Entity Framework and LINQ for efficient data access and query operations.
- Performed unit testing using NUnit to ensure application reliability and stability.
- Used Git for version control and collaborative development within the development team.
- Documented and tested APIs using Swagger and Postman.
- Integrated Azure Blob Storage for secure file storage and management in cloud environments.

### PROJECT

#### FSM (Field Service Management)

- Developed backend modules for job assignment, task scheduling, and technician management within the Field Service Management system.
- Built RESTful APIs to manage service requests, job status updates, and service reporting using .NET Core and C#.
- Implemented AMC/Warranty device management and service request handling with efficient MySQL database operations.
- Integrated Firebase push notifications to notify field technicians about assigned jobs and updates.
- Managed inventory operations including item allocation, stock dispatch, reimbursement requests, and leave management for field service staff.

## IVM (Inventory Management System)

- Developed backend RESTful APIs for inventory tracking, product management, and stock updates using .NET Core and C#.
- Implemented modules for quotation management, sales orders, and customer management within the inventory system.
- Designed and optimized MySQL database structures and queries for faster data retrieval using Entity Framework.
- Built features for stock requests, item categories, vendor stock allocation, lot number tracking, and dispatch management.
- Implemented sales return and purchase return workflows, notification systems, and secure admin authentication.

## CRM System (Customer Relationship Management)

- Developed backend services to manage customers, leads, sales activities, and deal management.
- Built RESTful APIs for handling customer data, lead , and sales operations using .NET Core and C#.
- Implemented features for sales meetings, task management, deal stages, and Reports.
- Integrated authentication and authorization mechanisms to ensure secure access to CRM modules.
- Optimized database queries and implemented notification functionality to improve system performance and user engagement.

---

## EDUCATION

Dhanalakshmi srinivasan engineering college | 2022-2024

### MCA (Master of Computer Application)

vyasa arts and science college for women | 2019-2022

### BSC(Bachelor's Degree in Computer Science)

S. Thangapazham Matriculation and Higher Secondary School| 2018-2019

### Higher Secondary Certificate (HSC)

---

## ADDITIONAL SKILLS

- Microsoft Excel
- Microsoft Word
- API Testing using Postman
- Documentation and Reporting
- Team Collaboration
